

Explore WATER

Think About:

1. What is your favorite thing about water?
2. What do you NOT like about water?
3. Where are all the places you have water in your house?
4. Where are all the places you see water outside?
5. What do you know about water safety?

Extensions:

1. Write a story and/or draw a picture about water.
2. Collect water from different sources in clear plastic cups and label - how does it look different? How is it the same?
3. After it rains, go outside and look for wet stuff and puddles. What did you find? Did you see a rainbow?
